SUMMARY

A fullstack developer and network engineer, I combine a passion for the architecture of things and an enjoyment of working with others to create intuitive and useful applications. I bring a systematized focus and attention to detail to what I do honed over years of working with mission critical systems and software.

TECHNICAL SKILLS

HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Firebase, MySQL Express, Handlebars.js & ReactJS, Sequelize, Express, Handlebars.js, Kepler, Mapbox

PROJECTS

Denixone | <https://github.com/seanhellier/denixone> | <https://denixone.herokuapp.com/>

- This app (created with Gavin Martin and Dan Mayor), uses React and Kepler / Mapbox to visually display large datasets of New York real estate sales across time in a visually intuitive way.
- Bootstrap4, React, Kepler, Mapbox, javascript

Clicky Game | <https://github.com/seanhellier/clicky-game> | <https://clicky-game-slh.herokuapp.com/>

- This game randomly positions dominoes in a grid, the user clicks on one, it reshuffles the grid, and the object is to click on each of the 12 dominoes only once.
- Bootstrap 4, Heroku, React

A Night Out | <https://github.com/seanhellier/a-night-out> | <https://a-night-out.herokuapp.com/>

- An app that allows users to search for events in NYC, receive a list, then obtain directions.
- Bootstrap, javascript, AJAX, the google map API
